HAYT FARMSTEAD, Poultry House III

HABS NO. NY-6300-L

HABS  
NY,  
4D-PA  
2-L-

Location: Route 311, Patterson, Putnam County, New York

Significance: This structure, as an agricultural outbuilding, contributes to the significance of the Hayt Farmstead.

Description: This L-plan frame poultry house has a slant roof, clapboard and board-and-batten siding, and rows of 8-light single sash hinged at the top on the east and south walls. The building is set partially on a crude stone perimeter foundation and partly on piles of stone. It is of post- and- beam construction, with extensive evidence of re-use of structural members. In addition to full-sized entrances in the north and west elevations, there is a small opening at the extreme west end of a size to admit poultry.

History: The construction date of this building is unknown.

Sources: See Narrative Overview.

Architectural Historian: M.H. Bowers, Louis Berger & Associates, Inc., February 1989.
